## Canine Aggression Screen

This screen can be used in three ways:

1. To note the presence or absence, at any time, of any of the behaviors.
2. To log the baseline behavior, noting how many times the behavior occurs, given the number of times it is attempted, per unit time (i.e., per week).
3. To log frequencies of the occurring behaviors, given the number of times the circumstance has been encountered, during treatment so that these numbers can be compared with # 2.

Note if the reaction is consistent in style or is directed toward only one person or is present in only one restricted circumstance. It is worth noting whether the dog is subjectively becoming more or less intense (or harder or easier to interrupt) in its behavior (>I [intensity], <I, relatively).

The process for treating behavior issues involves many important steps.

Step 1: Forms must be filled out in detail and returned to the clinic. These will be carefully reviewed by the doctor before your appointment. All of your answers are confidential. The cost for doctor review in preparation for visit and behavior consult is \$138.00, paid at form drop-off.

Step 2: After receiving forms and payment, the receptionist will schedule the exam, labwork and consultation.

Step 3: Bring your pet in for a physical exam, blood and urine tests and the behavior consultation with the doctor.

Costs: Physical Exam	\$ 66.00
Labwork	\$ 153.00
Behavior Consultation	\$ 138.00 <b><u>(pre-paid at step 1)</u></b>

Additional cost could include medications for physical or behavioral problems.

Step 4: At the end of the visit, written material will either be given to you or mailed.
